Technologies Used: Visual Studio 2005

Dynamic resource allocation in computing clouds using distributed multiple criteria decision analysis   **Feb-June 2011**

This project investigates a new approach for dynamic autonomous resource management in computing clouds. The main contribution of this work is two-fold. First, it adopts a distributed architecture where resource management is decomposed into independent tasks, each of which is performed by Autonomous Node Agents that are tightly coupled with the physical machines in a data centre. Second, the Autonomous Node Agents carry out configurations in parallel through Multiple Criteria Decision Analysis using the PROMETHEE method.

Technologies Used: JAVA

Achievements

Additional Academic Activities
- Completed **JAVA** training from GTT, Bangalore.
- Won 1st prize in Science Competition at school.
- Participated in the Entrepreneurship Awareness Camp conducted by Entrepreneurship Development Cell, VTU.
- Completed **Infosys Campus Connect Life Skills Program**.
